

ENERGY AUDIT AND PINCH STUDY

WHERE?

Petrochemical (LAB) facility in Jubail, KSA

WHY?

Challenges Addressed

- Data unavailability, full complex analysis

Goal

- Reduce energy consumption

Engagement

- Improve Energy Intensity

RESULT

Benefits Realized

Utilities utilized as efficiently as possible

Resulted in use of a process stream to reduce use of utilities for heating/cooling

Reduced the inherent need of heating/cooling for the process

Benefits - \$7,000,000

SOLUTION AND EXPERT SERVICES DEPLOYED

- Onsite data collection, utilities audit, data generation, Simulation, Pinch analysis using customized models, process analysis and what-ifs.
